EXTREME SEAL

BD NEW EXTREME SEAL A NEW DIAPHRAGM SHAFT SEAL

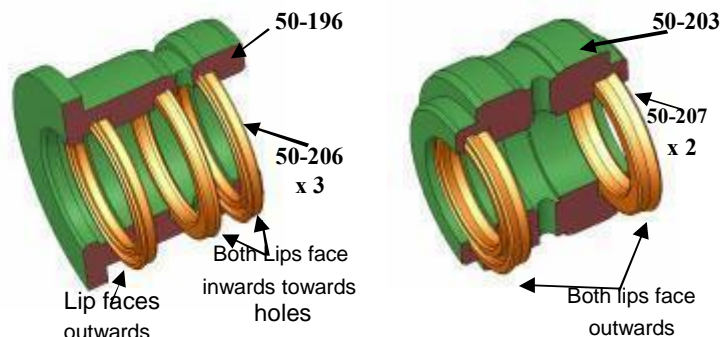

2" B5004 - DIAPHRAGM SHAFT BUSH & SEALS

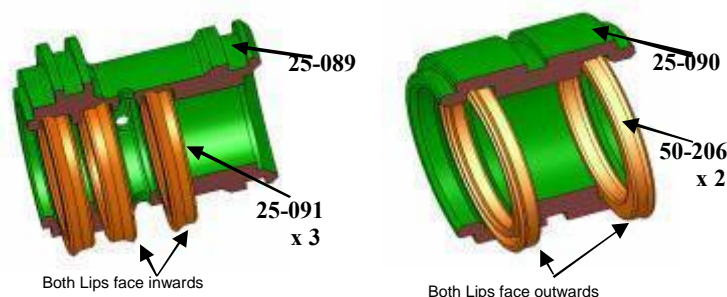

1 & 1 1/2" B25 & B4004

2" B5002W3 - DIAPHRAGM SHAFT BUSH & SPACER BUSH

1" B2501W3 - DIAPHRAGM SHAFT BUSH & SPACER BUSH

NEW AIR

SIDE KITS FOR HIGH PRESSURE PUMPS Including the new BD EXTREME Seal

The kits come with the seals pre-fitted in the bushes which ensures the correct fit and reduces the time taken to replace an Air Side Kit. The old bush is simply knocked out of the centre casting and the new bush put in its place. This will always ensure correct rebuild of the pump and guarantee start-up on reinstallation of the pump.

Kits can be order using the following numbers:

ASK25HPFF previously SA10459

ASK50HPFF previously SA10498

Any orders or enquiries can be made with the sales office by telephone or email on the numbers below.

TESTING

Extreme Seals have proven through in house and on site beta testing to last at least 6 x longer than the original design and the competition. Subsequently, the period between maintenance is much longer which results in less downtime and significant savings to the end user.

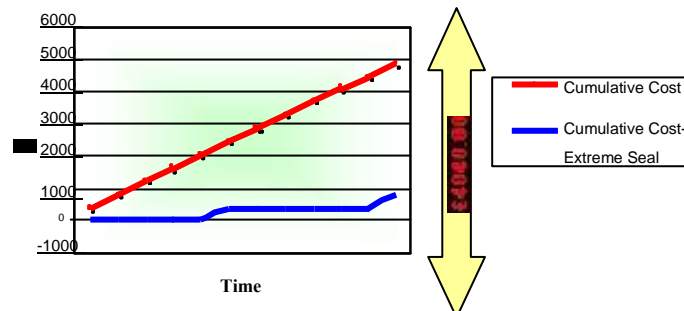

EXAMPLE

This example is a typical savings opportunity for the new seal. It assumes 45mins to strip and re-build @ 45/hr and a 500/hr loss in production during maintenance.

Over the typical 12 x occurrence maintenance cycle of the old seal the saving would be **≈4040.00**

Extreme Seal

Maintenance Costs Comparison Example

The one company that will deliver highly engineered fluid moving solutions and service in niche markets and extreme condition environments
